

GEORGIA'S HIGH CRASH CORRIDORS

GMTA worked with MCCD and GDOT's Connected Data Platform to determine areas that are chronically home to driver-error fatal crashes. The maps below showing these areas is based on five years of crash reports as analyzed by GDOT. Please note the areas and the advice for each and share with CMV and automobile drivers alike.

Location 1: I-285 at I-75 (North side, all approaches)

Often Congested, be alert and prepared to stop

Location 2: I-285 SB to I-20 WB

Sharply curved intersection, multiple mergers, slow down

Location 3: I-20 EB at I-285 Merge

Often heavy merging traffic, right lanes use caution

Location 4: I-20 at Thornton Rd

Traffic often slows near Thornton Road, be prepared to stop

Location 5: I-75 near Jonesboro Rd

Limited visibility merger, prepare to stop

Location 6: I-675 SB to I-75 SB

Sharp curve, often heavy traffic, slow down
